

Real-time student feedback to lift student performance and improve retention

For students

- Market leading anonymity functionality to ensure no students are left behind
- Response rates up to 11x times higher than traditional methods

“Loop has allowed me to have a better experience on my course because I can be honest in the app.”

– LOOP STUDENT

For teachers

- Light, fast way to understand teaching impact
- Make immediate changes in the classroom to support student learning

“Loop lets me know who is struggling and helps me to engage all my students.”

– LOOP TEACHER

For institutions

- Instant, institutional data to improve the student experience
- Reduce the time to gather student feedback from months to seconds

“Our engagement with Loop has been high value and high impact to support innovative teaching practices across our institution.”

– LOOP INSTITUTION

Loop’s mobile app and feedback platform has been deployed by Australia’s leading institutions

We know that student feedback is one of the most effective ways to lift student performance and completion, improve teacher practice, and deliver a world-class student experience.

Yet, most institutions rely upon fatigued data collection methods with several shortcomings, such as:

- 1 Lack of data** through not being able to offer a compelling, contemporary medium to gather information
- 2 Lack of anonymity functionality** to ensure that all views are gathered, including from international students
- 3 Lack of fast, meaningful change**, with data collected, analysed and distributed long after the fact

Implementing a contemporary student feedback system means:

- 1 Increased student satisfaction**
- 2 Increased student retention**
- 3 Improved teaching practice**
- 4 Increased reputation**
- 5 Increased enrolments**

Loop's student feedback platform is best in class
